**Hey Students!**   
We are excited to have launched the revamped user interface for Piazza! You asked, and we listened – our team has been hard at work developing a modern user interface while maintaining all of the features and capabilities that you are familiar with.  
Tutorial/Demo and How-To for Students  
We are confident that you'll find the new interface very intuitive, but nonetheless for Tutorial/Demo and How-To we have:

- [Piazza Introduction for students](#)
- [Support articles for Students](#)

Our new user interface has further improved the screen responsive and accessibility experience, whether you are accessing Piazza on your computer, tablet, or mobile device.  
Piazza mobile app: Professors, TAs and Students can download the Piazza iOS app from the Apple App Store, or the Android app from the Google Play store, and if you already have the legacy mobile app, update it in the app store.  
From now until early October, the new user interface is live (until then, the new user interface is the default, and you can switch back and forth to the former legacy/old interface by clicking your name icon on the upper right for the settings dropdown menu, then selecting "Access Legacy User Interface"). In early October, only the new user interface will remain available thereafter.
